# INITIATIVE HIGHLIGHTS

## 1 Independence

Fairfield DD utilizes technology to enhance independence. A total of 32 tours were conducted in the assistive technology area to educate and advocate for independence. Sixteen individuals benefited from remote support technology for monitoring, enabling them to allocate time for their personal pursuits. This is an increase from 10 people in 2022.

## 2 Inclusion

Staff at Fairfield DD collaborated with service providers and community partners to enhance awareness of inclusion and the mission of Fairfield DD. Team members partnered with 5 organizations to increase inclusion by promoting genuine community engagement based on individuals' unique interests.

## 3 Inspired Workforce

Throughout 2023, Fairfield DD dedicated time to solidifying its mission and articulating the core values that guide the team in their daily work. Team members actively participated in training sessions and engaged in discussions centered around these values. In preparation for the upcoming year, a new evaluation tool has been developed with a specific focus on assessing how well these values are being lived out.

## 4 Collaboration

Fairfield DD collaborates with a diverse range of agencies, families, and individuals across the county to meet needs efficiently. Simplifying processes allows for greater success in these partnerships. In 2023, Fairfield DD initiated the adoption of the Ohio ISP through an integrated information system, resulting in the development of 663 plans by team members.
